### Covered Bridges of Blount County (N-19)

Cleveland; (205) 247-9640

Three of Alabama's 11 covered bridges can be found in Blount County, nestled into the curves of both roads and rivers, making this county the Covered Bridge Capital of Alabama. All three bridges are listed on the National Register of Historic Places. All have been restored to once again support car traffic – though with a single lane and a speed limit of 5 mph.

Rising 70 feet, **Horton Mill Bridge** stands as the highest covered bridge above any U.S. waterway. The original structure was built in 1894. Construction of the bridge we see today came 40 years later. A 15-man crew completed the 220-foot bridge in a year and a half with lumber bought for \$714. Look for the bridge five miles north of Oneonta on Alabama Highway 75.

**Old Easley Covered Bridge** is the smallest and oldest of the bridges, its single span is perhaps the most picturesque. Crossing the Dub Branch of the Calvert Prong of the Black Warrior River, Old Easley was used from 1927 until 2009, when it was restored. The bridge sits three miles west of Oneonta, 1.5 miles off U.S. 231.

The third bridge was called **Swann** on one side and **Joy** on the other, depending on which community you called home. Perched over a scenic gorge, the bridge connected the town of Cleveland to the community of Joy. The triple spans of the Swann Covered Bridge stretch 324 feet, making it the longest covered bridge in Alabama and one of the longest in the U.S. It rises 27 feet above the rocky riverbed of the Locust Fork, a tributary of the Black Warrior River. It lies one mile off Alabama Highway 79, near Cleveland.
